WHO WE ARE

Established in 1874 in Moknine, the Sahel region of Tunisia, we, Loued family, inherited from our ancestors of five generations the passion for olive oil, along with the art of making a delicious juice out of this symbolic fruit.

From the groves to your table, we invest our greatest care in every step of the process, responding to the most severe international quality standards and retaining the authenticity of the product.

The olives are carefully picked at their optimal degree of maturity. No pesticides are used, harvest is manual to get healthy fruits, to avoid harming the tree and to preserve the aromatic flavours of the olive in order to guarantee the production of a premium oil.

The same day, the olives are transported in ventilated crates to our mills where they will be selected with great care, defoliated, washed with clean water then crushed and mixed.

The oil will be separated from the olive paste by cold pressure in order to preserve its taste and flavour.

The extraction process is driven by the latest machinery systems made of stainless steel. The storage of the oil is made in subterranean ceramic vats to ensure to our customers a high quality olive oil.
